**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10, 12-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lynn (3,697,290).

The claims are rejected for the reasons of record cited in the last office action and for these further reasons.

Claim 17 further requires that the consistency of the substance is determined by the amount of added acidic liquid or acidulant and claim 18 that the second substance is acidified by bacteria. However, the reference discloses that a mild acid is added to the non-elastic protein material (col. 8, lines 36-44). Additional water is added, but this is not seen to keep the acidulant from controlling the consistency, as the claim is an open, comprising claim and water can be added to the composition. The use of acid producing bacteria is well known, as in claim 18 and the liquid is still acid. No patentable distinction is seen at this time in using a liquid acidified by bacteria or one acidified by other acids absent a showing of new or unobvious results. Therefore, it would have been obvious to add acids produced by bacteria into the claimed composition to control the consistency.

**ALLOWABLE SUBJECT MATTER**

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ARGUMENTS

Applicant's arguments filed 10-8-02 have been fully considered but they are not persuasive. Applicant argues that the present invention provides a creamy substance, which can be used as a substitute for yogurt, etc. and that the product of Lynn is to dough for baking bread. However, the claims are open comprising claims and do not exclude any bread ingredients, or any baking limitations. No amounts are included in claim 1 to determine if the product is firm or a liquid. Therefore, it is seen that the reference reads on the claim limitations at this time.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
